

AMENDMENTS TO THE CLAIMS

Claims 1-7 (canceled)

Claim 8 (new): An easy-locking buckle structure, comprising:

- (a) a male buckle element in form of a rectangular tab, being provided with a post extending downwardly from a bottom of one end, and a first cover on a top, the post being engaged with a socket having a hole, a holding tab being provided at the other end of the male buckle element; and
- (b) a female buckle element having a hole in a bottom of a conical recess provided with slots at sides and a plurality of connecting pins at a bottom for combining to a second cover;

thereby after the male and female buckle elements are combined together, the male and female buckle elements are locked and detached repeatedly.

Claim 9 (new): The easy locking buckle structure according to claim 8, wherein the holding tab of the male buckle element raises toward a direction opposite to the post.

Claim 10 (new): The easy-locking buckle structure according to claim 8, wherein a blunt end having a greater outer diameter than that of the post is provided on a top of the post of the male buckle element.

Claim 11 (new): The easy-locking buckle structure according to claim 8, wherein a depressed step edge is provided at an inner periphery of the hole of the socket engaged with the post of the male buckle element.

Claim 12 (new): The easy-locking buckle structure according to Claim 8, wherein a cylinder of the socket of the male buckle element has a length shorter than that of the post.

Claim 13 (new): The easy-locking buckle structure according to Claim 8, wherein a logo is provided on the first cover of the male buckle element.

Claim 14 (new): The easy-locking buckle structure according to claim 8, wherein a plurality of slots are provided on the sides of the conical recess of the female buckle element.
